

I can format the complete project into a **PDF-ready document**, but I can't directly attach a generated PDF file in this chat.

I can, however, create a **properly formatted Word/Google Docs-ready version** with:

- Cover page
- Certificate
- Declaration
- Acknowledgement
- Table of contents
- All 10 chapters
- Tables
- Salesforce formulas
- Project planning tables
- Testing
- Conclusion
- Future scope
- References

You can then export it as **PDF** with one click.
